

Responsible Business Communication

The LeapXpert Communications Platform provides organizations peace of mind by creating an accessible digital record of all business communications conducted over voice and mobile messaging applications.

Gain full ownership of all your business communications - anytime, anywhere, from any platform

As the risks of slipping out of compliance and losing ownership over critical data grow, LeapXpert provides financial institutions with real-time visibility and total control over their internal and client-facing business conversations.

The LeapXpert Communications Platform is a pioneering enterprise solution for compliant and secure communications between employees and clients on consumer messaging applications and voice channels. It enables enterprises to achieve regulatory compliance and meet strict governance policies through its comprehensive data capture and unrivaled data security and control capabilities.

The LeapXpert Communications Platform

The platform enables rich communication flows such as voice calls, 1:1 chats, group chats and broadcast communication, and supports multiple media types including text, voice and file media, from Leap Work application or productivity platforms such as Microsoft Teams, WeCom and Slack. It includes multiple enterprise controls including information barriers, file antivirus and malware prevention and Data Leakage Protection (DLP).

The LeapXpert Communications Platform integrates with voice infrastructure and leading consumer messaging including WhatsApp, iMessage, SMS, Telegram, WeChat, Telegram, Signal, and LINE. An open API-based architecture enables easy integration with enterprise systems, applications, and processes such as archiving, security, monitoring and surveillance, and CRM.
